

**ELECTRONIC DEVICE WITH PAGING FOR ENERGY CURTAILMENT AND CODE
GENERATION FOR MANUAL VERIFICATION OF CURTAILMENT**

5

ABSTRACT OF THE DISCLOSURE

A curtailment module is disclosed for enabling an energy provider to send a request to curtail energy use to a user. The curtailment module includes an interface for electronic communications with a temperature control device. A paging module is used to receive the request from the energy provider through a paging network. The curtailment module also includes a processor in electronic communication with the paging module for receiving the request from the paging module. Memory is also included and is in electronic communication with the processor.
